

RS DROP-DOWN FLOOD BARRIER

The ideal flood protection for industrial sites.

MANUAL OPERATION NOT NEEDED SAFETY& ALARM SYSTEMS AT HAND

ADVANTAGES

Water sensors activate the drop-down flood barrier; there's no need to operate it yourself.

Control the barrier with a turn-a-key mechanism that can be equipped with an auxiliary battery system; it works even during power blackout.

The barrier is located above the head of the opening; it does not obstruct the entrance.

Can be equipped with alarm and safety systems to alert everyone of the lowering barrier.

Excavation is not required in installing the barrier; installation becomes easier and more economical.

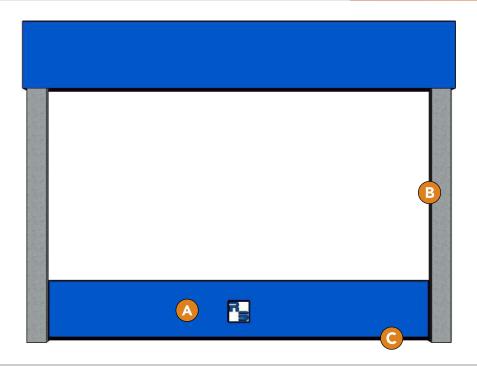

The barrier can be in any RAL color and can be mounted behind building frontages; it also suits locations like shopping centers, hotel lobbies, plazas, etc.

I tried searching for flood defenses and I found out that there is Flood Control Asia RS, a German technology, European brand, and thinking that it has a better quality, we decided to contact FCA... My husband said, It's better to have German technology because it has better quality."

Gloria Chua Homeowner, Businesswoman Cabanatuan, Philippines

TECHNICAL SPECIFICATIONS

(A) Barrier Panel

A lightweight aluminum flood barrier that is resistant to seawater and high water pressure.

Material: Extrudeed Aluminum Panels, Hollow Structure, No weld

Width: Up to 10,000mm

B) Side Channels

Used to hold the aluminum panels at

Material: Hot-Dipped Galvanized Steel Color: RAL color

Sealing: RS Vertical Seal (EPDM)

(C) Seals

Secured with aluminum alloy seal retainers bolted to the barrier panel.

Sealing: 3-sided EPDM Seal

Material: Ethylene Propylene Diene Monomer (EPDM)

RS Ground Beam with Anchor Plates

Ensures that all the components are leveled and are more structurally stable.

Material: Stainless/ Galvanized ground beam

Length: Unlimited

Span: 2,500mm (including RS Anchor Plates)

Safety Systems

Ensures people's safety around the barrier.

Trigger: Water sensor, manual switch key, smartphone app

Supervision: CCTV system, laser monitoring Control: Control center, computer, tablet,

smartphone

APPLICATIONS

Underground Entrances

Commercial Establishments

Open Areas

Doorways

Wide Entrances

Driveway Entrances

Avoid un predictable damages and losses caused by floods. Achieve real peace of mind with our German flood solution.
