ADVANTAGES

After usage, can be **dismantled and stored in RS Storage System** for future use against various types of flooding situations.

Eliminates leakage compared to other systems, with low rates according to German Norm DIN 19569-4.2000-01 and US-American FM Global certification No. 3053317 (June 20, 2016).

Extremely **resistant to intense flood-water pressure** because of their hollow but high-end honeycomb structure "Made in Germany".

Designed to withstand temperatures below -40°C, strong sunlight, and temperatures up to 80°C.

Can be powder coated with RAL color standard or others.

Extremely durable and can resist blunt forces caused by floating debris as certified by FM Global for certain applications.

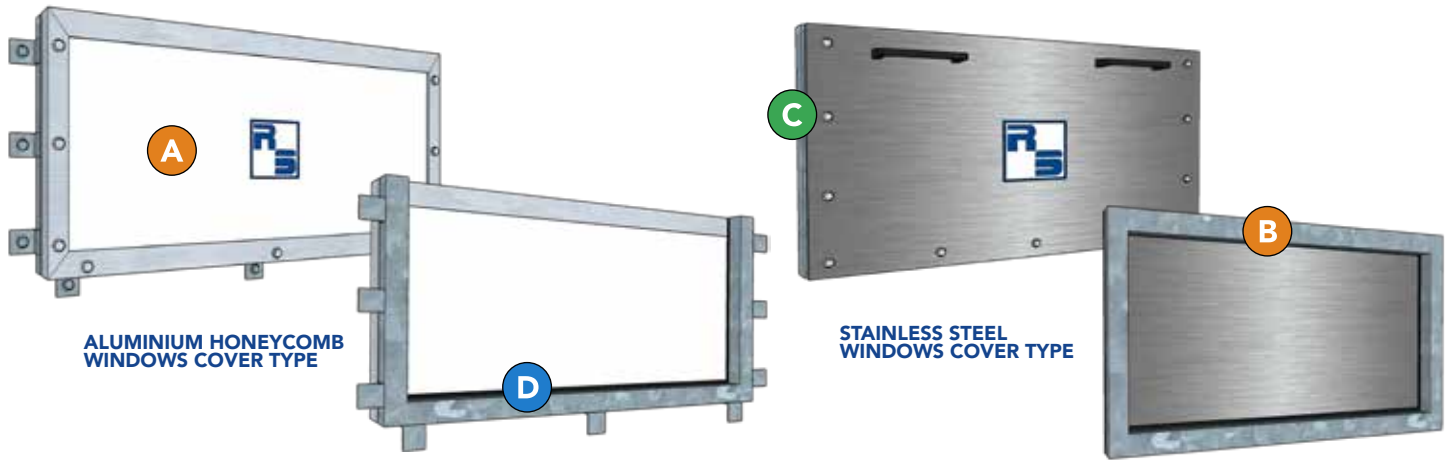

God has given us the right company to give us that peace of mind that we cannot get from anywhere.
